**AN INVALUABLE NEW ONLINE RESOURCE FOR VALVE  
SELECTION AND MAINTENANCE**

**Calculation program, animated graphics, videos and a wealth of  
technical data, all on Honeywell web site**

BRACKNELL, 13 October 2003 – An invaluable online resource for selecting, sizing and maintaining water control, pressure reduction and backflow prevention valves has been launched by Honeywell at [www.honeywell-valvesizing.com](http://www.honeywell-valvesizing.com). The extensive site features a calculation program, animated examples of applications and products, videos showing maintenance procedures, and a wealth of technical data.

The calculation programme determines the model and size of the ideal valve – control, pressure regulation or backflow prevention – for each application, with its appropriate filter. Clear animated graphics answer questions such as “What valve do I need?”, “How does it work?” and “How is it used?” Service engineers will value the real-time videos, showing disassembly and assembly, and the cutaway product drawings which call up a photo and description of each component as the cursor is moved over the valve.

Specification sheets can be downloaded from the site as PDF files.

Visit to register free of charge.
