## **HONEYWELL D04 PRESSURE REDUCING VALVE PROVIDES EXCELLENT VALUE**

*Low-cost means to protect household, industrial and commercial installations from damage caused by excessive water supply pressure*

BRACKNELL, UK, 4 December 2003

Honeywell's D04 is a new "no frills" pressure reducing valve, featuring a simple construction and output pressure adjustment knob. It provides excellent value as a means to protect household, industrial and commercial installations from damage caused by excessive water supply pressure. By maintaining a constant ideal pressure, it also reduces water consumption and minimises flow noise in the system.

The D04 has a brass, dezincification-resistant body with ½ and ¾ inch (15 or 20 mm) internal threads and 15mm and 22mm compression connection options. It has a setpoint range from 1.5 to 6 bar and its pressure adjustment spring is not in contact with the potable water. Pressure gauges up to 4 and 10 bar are optionally available.
